WORK EXPERIENCES

Sharpstakes AI, Remote

Business Development & Sales Intern | Remote

January 2026 - April 2026

- Supported business development initiatives for an AI-driven sports analytics platform by identifying and researching potential clients, partners, and market segments.
- Conducted outbound sales and outreach through email, LinkedIn, and direct messaging, contributing to lead generation and early customer acquisition efforts.
- Assisted in sales pipeline management by tracking prospects, engagement metrics, and follow-ups using spreadsheets and CRM-style workflows.
- Collaborated with founders and senior team members to refine value propositions, pitch messaging, and go-to-market strategy.
- Analyzed customer feedback and market trends to help improve product positioning and sales approach.
- Gained hands-on experience in startup sales operations, client communication, and revenue-focused strategy within an AI-focused company.

NIKE

Sales Associate | Retail Pro

Vaughan, ON

Jan 2024 – present

- Contributed to a high-volume retail location achieving \$30M in annual sales, consistently meeting daily and hourly sales-per-labor-hour targets in a fast-paced, goal-driven environment
- Built a relationship with customers quickly to understand their needs and recommend products, driving repeat visits and positive customer feedback
- Consistently ranked among top performers in daily sales conversations, using product knowledge and relationship-building to convert browsers into buyers
- Maintained strong customer satisfaction scores by gathering and acting on feedback to improve the in-store experience
- Collaborated cross-functionally with team members to hit store-wide sales goals and maintain smooth daily operations

Canada's Wonderland, Toronto

Team Lead - Games Department

March 2023 - December 2023

- Supervised daily game booth operations and supported a team in delivering a positive guest experience.
- Trained new team members on operating procedures and customer service standards.
- Resolved guest concerns and answered questions in a fast-paced, high-volume environment.
- Managed prize inventory and ensured game booths remained organized and fully stocked.
- Worked with supervisors and team members to keep operations running efficiently during peak hours.

- Provided IT support and troubleshooting for staff and volunteers, resolving technical issues across Windows, Microsoft Office, and Google Workspace platforms
- Worked directly with non-technical staff to understand issues, explain solutions in clear terms, and confirm fixes met their needs
- Built simple guides and how-to documentation to help less tech-savvy users solve common issues independently
- Identified recurring technical problems and flagged patterns to improve overall system reliability
- Balanced multiple support requests at once while maintaining responsiveness and follow-through

PROJECTS & GROWTH INITIATIVE

Content Creator | TikTok

January 2026 - present

- Built and grew a personal brand around hair care and personal development content, reaching 1000+ followers and averaging 10,000+ views per video through consistent posting and audience engagement
- Developed content strategy and analyzed engagement trends to optimize reach and audience retention, applying basic marketing and analytics principles
- Researched and tested content formats and posting strategies to identify what resonated most with target audience, applying changes based on performance data
- Engaged directly with audience through comments and community interaction, building a loyal following and strengthening brand presence within a niche market

Data Analyst Portfolio Project | Self-Directed AdventureWorks Sample Database– Microsoft

September 2025

End-to-end data analytics project simulating a real business request, from data extraction and transformation to dashboard creation and insights.

- Interpreted a business request and translated it into measurable KPIs and analysis goals
- Performed data cleansing, transformation, and modeling using SQL; applied ETL processes to prepare datasets for analysis
- Designed and built an interactive Power BI dashboard to deliver actionable business insights, documenting the full project lifecycle

Business Operations & Automation Simulation | Raptor, Excel, Powerpoint

November 2024

An individual simulation project focused on identifying inefficiencies within a virtual grocery business and proposing enterprise system solutions to enhance operations.

- Participated in a simulated SDLC project identifying inefficiencies within a virtual grocery business and proposing enterprise system solutions
- Gathered and documented business requirements through simulated stakeholder engagement; created current-state and future-state process flows
- Conducted impact and gap analysis to assess risk and feasibility, presenting recommendations using structured documentation

GloBus Business Simulation- GMS(Global Management Studies) 200

September 2024

A group-based business strategy simulation where students managed a virtual company competing in a global market.

- Interpreted a business request and translated it into analytical and functional requirements
- Analyzed data to identify trends and insights supporting business decision-making
- Documented analysis steps, assumptions, and outputs to support transparency and reuse
- Communicated insights through dashboards and summaries designed for non-technical stakeholders

LEADERSHIP

Metropolitan Data Science Association | Toronto Metropolitan University.

September 2025- April 2026

General Associate

- Collaborating on group projects involving data analysis, systems, and real-world problem solving
- Gaining exposure to analytics, tooling, and structured thinking through workshops and team activities

Black Student Association | Tommy Douglas Secondary School

Vaughan, ON

Marketing and Outreach Lead

Sep 2023 – June 2024

- Led promotional efforts for school-wide BSA events by collaborating with graphic designers to create posters, flyers, and social media content.
- Increased student engagement and event turnout by organizing outreach campaigns and encouraging participation during lunch-hour.
- Played a key role in building club membership through consistent communication and visibility efforts across the student body.
